RESPONSE TO AMENDMENT

1. Claims 2 and 5-12 are pending in the application, claims 1, 3 and 4 have been cancelled.
2. Amendments to the claims, filed on September 26, 2005, have been entered in the above-identified application.

REJECTIONS

3. **The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.**

Claim Objections

4. Claim 11 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 9 from which claim 11 depends, has been amended to include all the limitations of claim 11. Namely, "wherein the chromium-oxide deposit having a composition consisting of chromium-oxide.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1772

6. Claims 2 and 5-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In the instant case amended claims 5-9 contain the limitation "chromium-oxide deposited formed directly on the metallic body." The specification does explicitly disclose that the chromium-oxide layer is formed directly on the metallic body, therefore this limitation is considered new matter. Rather the specification on page 6, lines 4-11 recites, "In the invention, a contact ability of an interface between the metallic material and a coat film is improved by coating chromium onto the metallic material and then oxidizing the chromium. It specifically states that the coat film is improved by coating chromium onto the metallic material. Furthermore, on page 9 of the specification it recites that the chromium-oxide passivation film is substantially 100%, which means that there is chromium left in the coating. Thus forming a chromium/chromium oxide surface treatment.

The new matter must be deleted.

7. Claims 2 and 5-12 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The thickness of the passivation film is critical or essential to the practice of the invention, but not included in the claims is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). Applicant discloses on page 9 of the specification that it was verified that the chromium-oxide passivation film of substantially 100% has been formed, which is approximately 30 nm from the outermost surface. Therefore, in

Art Unit: 1772

order to obtain good adhesion yet have an nearly fully oxidized chromium passivation film, it is essentially to have the correct thickness.

ANSWERS TO APPLICANT'S ARGUMENTS

8. Applicant's arguments in the response filed September 26, 2005 regarding the 35 U.S.C. 103 rejections of record have been considered but are moot since the rejections have been withdrawn.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
